EDUCATION BACKGROUND

Hong Kong Baptist University

Master of Science in AI & Digital Media

Sep 2024-Jun 2025

Core Courses: Data Analysis and Visualization Studio, Basic Programming for Data Science, Big Data Management and Analytics

Sep 2020-Jun 2024

Inner Mongolia University (Project 211)

Bachelor of Arts in Internet and New Media GPA 3.58/4.0

Core Courses: The Analysis and Application of Big Data, Data Journalism, Public Relations, Advanced Mathematics, Probability Theory

Third Class Scholarship for University-level Academic Outstanding Students.

RESEARCH PROJECT

CAPTCHA Recognition System Using TensorFlow

Mar 2025 - Apr 2025

- Developed a robust CAPTCHA recognition system using convolutional neural networks (CNN) implemented in TensorFlow to accurately identify character-based image CAPTCHAs.
- Designed and encapsulated modular components for validation, training, testing, recognition, and API integration, significantly streamlining the CAPTCHA recognition workflow and reducing development effort.
- Built a highly extensible and reusable codebase, enabling quick adaptation to various CAPTCHA styles and supporting further customization.

Korean Drama Popularity Trend Analysis and Exploration

Sep2024 - Dec 2024

- To explore the types and trends of popular K-Dramas in recent years, acquired over 20 open-source K-Drama databases and split them into 13 data tables. After cleaning, imported the data into MongoDB and used Python (Matplotlib, Pandas), SQL and Tableau to create visual analysis dashboards.
- Analyzed the changes in popular K-Drama genres and durations, discovering that shorter, fast-paced dramas have stronger appeal in the current content consumption landscape. Audience interest has shifted from traditional ethical plots to content with greater emotional resonance, providing strong support for strategic decision-making in the content industry.

WHO Chronic Disease Correlation Analysis

Sep2024 - Dec 2024

- Conducted a correlation study on global chronic disease development trends in recent years using WHO public datasets as samples. Developed multiple web scraping scripts to address variations in source data formats.
- Employed Python libraries (Pandas, Numpy, Matplotlib) for data exploration, debugging, and visualization. Investigated the distribution of major chronic diseases across different regions globally and explored correlation factors such as gender and regional development. Compiled findings into a report and presentation.

INTERNSHIP EXPERIENCE

DFS Duty-Free

Intern of Marketing Department

Mar 2025-Present

- Developed a comprehensive KOS performance tracking system using Excel, collected and analyzed content effectiveness data, and identified trends to optimize marketing strategies, resulting in significant improvements in ROI.
- Conducted data-driven analysis of promotional events and social media campaigns, leveraging A/B testing to refine strategies and achieve increase in conversion rates.
- Managed and monitored the performance of 8 KOS partners, utilizing data visualization and reporting to evaluate collaboration effectiveness and provide actionable insights for future initiatives.

People's Daily Online

Editorial Intern

Mar 2024 - Jun 2024

- Covered events like "Splendid Northern Frontier · Blossoming Green City" and "Progressing China: Vibrant Inner Mongolia" by organizing interviews, writing articles, and producing short videos. Published over 60 pieces on the official website and WeChat, with three articles reprinted by People's Daily and several exceeding 10,000 views.
- Analyzed user interactions on WeChat and video accounts to identify audience preferences. Used data visualization to highlight engaging activities, such as marathons and exhibitions, providing insights for content strategy.

Skill

- Technical Skills: Proficient in SQL, Python, Tableau, SPSS, and Microsoft Excel for data processing, visualization, and management; basic machine learning skills with Orange3.
 - Media and Design Skills: Experienced in multimedia production using Photoshop, After Effects, Cinema 4D, Procreate, and Figma; skilled in HTML5 for webpage design
 - Language Proficiency: English: proficient; Mandarin: Native; Cantonese: intermediate
-
